Editorial Review

About the Author

For **Elaine N. Marieb**, taking the student's perspective into account has always been an integral part of her teaching style. Dr. Marieb began her teaching career at Springfield College, where she taught anatomy and physiology to physical education majors. She then joined the faculty of the Biological Science Division of Holyoke Community College in 1969 after receiving her Ph.D. in zoology from the University of Massachusetts at Amherst. While teaching at Holyoke Community College, where many of her students were pursuing nursing degrees, she developed a desire to better understand the relationship between the scientific study of the human body and the clinical aspects of the nursing practice. To that end, while continuing to teach full time, Dr. Marieb pursued her nursing education, which culminated in a Master of Science degree with a clinical specialization in gerontology from the University of Massachusetts. It is this experience that has informed the development of the unique perspective and accessibility for which her publications are known.

Dr. Marieb has partnered with Benjamin Cummings for over 30 years. Her first work was *Human Anatomy & Physiology Laboratory Manual (Cat Version)*, which came out in 1981. In the years since, several other lab manual versions and study guides, as well as the softcover *Essentials of Human Anatomy & Physiology* textbook, have hit the campus bookstores. This textbook, now in its 10th edition, made its appearance in 1989 and is the latest expression of her commitment to the needs of students studying human anatomy and physiology.

Dr. Marieb has given generously to colleges both near and far to provide opportunities for students to further their education. She contributes to the New Directions, New Careers Program at Holyoke Community College by funding a staffed drop-in center and by providing several full-tuition scholarships each year for women who are returning to college after a hiatus or attending college for the first time and who would be unable to continue their studies without financial support. She funds the E. N. Marieb Science Research Awards at Mount Holyoke College, which promotes research by undergraduate science majors, and has underwritten renovation and updating of one of the biology labs in Clapp Laboratory at that college. Dr. Marieb also contributes to the University of Massachusetts at Amherst where she generously provided funding for reconstruction and instrumentation of a cutting-edge cytology research laboratory. Recognizing the severe national shortage of nursing faculty, she underwrites the Nursing Scholars of the Future Grant Program at the university.

In 1994, Dr. Marieb received the Benefactor Award from the National Council for Resource Development, American Association of Community Colleges, which recognizes her ongoing sponsorship of student scholarships, faculty teaching awards, and other academic contributions to Holyoke Community College. In May 2000, the science building at Holyoke Community College was named in her honor.

Dr. Marieb is an active member of the Human Anatomy and Physiology Society (HAPS) and the American Association for the Advancement of Science (AAAS). Additionally, while actively engaged as an author, Dr. Marieb serves as a consultant for the Benjamin Cummings Interactive Physiology® CD-ROM series.

When not involved in academic pursuits, Dr. Marieb is a world traveler and has vowed to visit every country on this planet. Shorter term, she serves on the scholarship committee of the Women's Resources Center and

on the board of directors of several charitable institutions in Sarasota County. She is an enthusiastic supporter of the local arts and enjoys a competitive match of doubles tennis.

Lori A. Smith received her Ph.D. in Biochemistry from the University of California at Davis. Before discovering her passion for teaching, she worked as a research scientist and project leader in the medical diagnostics industry. In 1999, she joined the faculty at American River College in the Biology Department. Currently she teaches anatomy and physiology and microbiology to pre-nursing and mortuary science students at American River College. Starting in 2005, she began co-authoring Pearson's *PhysioEx: Laboratory Simulations in Physiology* and has continued to co-author several versions of the software and lab manual. She is also co-authoring Pearson's *Human Anatomy & Physiology Lab Manual*. Dr. Smith has been awarded "Instructor of the Year" by the American River College Associated Students for her commitment to serving students, and she is a member of the Human Anatomy and Physiology Society (HAPS) and the National Association of Biology Teachers (NABT).

Users Review

From reader reviews:

Jane Rich:

Do you have favorite book? Should you have, what is your favorite's book? Publication is very important thing for us to know everything in the world. Each book has different aim or perhaps goal; it means that e-book has different type. Some people truly feel enjoy to spend their time for you to read a book. They may be reading whatever they get because their hobby is definitely reading a book. Think about the person who don't like reading through a book? Sometime, man feel need book whenever they found difficult problem or even exercise. Well, probably you will want this Human Anatomy Laboratory Manual with Cat Dissections (8th Edition).

Gregory McCormick:

The book Human Anatomy Laboratory Manual with Cat Dissections (8th Edition) make you feel enjoy for your spare time. You can use to make your capable much more increase. Book can to become your best friend when you getting pressure or having big problem with the subject. If you can make studying a book Human Anatomy Laboratory Manual with Cat Dissections (8th Edition) to be your habit, you can get far more advantages, like add your own capable, increase your knowledge about a number of or all subjects. It is possible to know everything if you like available and read a guide Human Anatomy Laboratory Manual with Cat Dissections (8th Edition). Kinds of book are a lot of. It means that, science reserve or encyclopedia or other people. So , how do you think about this publication?

John Merritt:

Book is to be different for every single grade. Book for children until finally adult are different content. As we know that book is very important normally. The book Human Anatomy Laboratory Manual with Cat Dissections (8th Edition) was making you to know about other information and of course you can take more information. It is quite advantages for you. The book Human Anatomy Laboratory Manual with Cat Dissections (8th Edition) is not only giving you far more new information but also to be your friend when

you truly feel bored. You can spend your spend time to read your reserve. Try to make relationship using the book Human Anatomy Laboratory Manual with Cat Dissections (8th Edition). You never feel lose out for everything in case you read some books.

Chuck Bryson:

The e-book untitled Human Anatomy Laboratory Manual with Cat Dissections (8th Edition) is the publication that recommended to you to study. You can see the quality of the book content that will be shown to you. The language that publisher use to explained their ideas are easily to understand. The article writer was did a lot of research when write the book, to ensure the information that they share to you personally is absolutely accurate. You also could get the e-book of Human Anatomy Laboratory Manual with Cat Dissections (8th Edition) from the publisher to make you considerably more enjoy free time.
