**Motivation: Biological, Psychological, and Environmental (3rd Edition)** By Lambert Deckers

**Well-grounded in the history of the field, *Motivation* combines classic studies with current research, while promoting the idea that motivation stems from physiological states, psychological motives, and environmental incentives and goals.**

*Motivation* provides an overarching organizational scheme of how motivation (the inducement of action, feelings, and thought) leads to behavior from physiological, psychological, and environmental sources. The material draws on topics that are familiar to students while maintaining a conversational tone to sustain student interest.

### **Editorial Review**

From the Back Cover

Pearson's MySearchLab is the easiest way for students to master a writing or research project. In a recent student survey, the overwhelming majority of students are assigned writing and research projects, for which they would use research and citation tools if they were available to them. MySearchLab is a website available at no additional charge in a package with a Pearson textbook and is also available as a standalone product.
