Primate Dentition: An Introduction to the Teeth of Non-human Primates (Cambridge Studies in Biological and Evolutionary Anthropology) By Daris R. Swindler

Primate Dentition provides a comparative dental anatomy of living non-human primates that brings together information from many disciplines to present the most useful and comprehensive database possible in one consolidated text. The core of the book consists of comparative morphological and metrical descriptions with analyses, reference tables, and illustrations of the permanent dentitions of 85 living primate species to establish a baseline for future investigations. The volume also discusses dental microstructure and its importance in understanding taxonomic relationships between species, data on deciduous dentitions, prenatal dental development and ontogenetic processes, and material to aid age estimation and life history studies.

Editorial Review

Review

"...Swindler's book is a classic, and I am delighted to see this updated version come along. Students and researchers alike have always, and will for years to come, find it useful for its stated purpose--an introductory guide to primate dentitions." *International Journal of Primatology*

"Swindler ... has been a leader in the study of the teeth of primates ... for decades. Following introductory material on the structure and growth of teeth, Swindler describes and illustrates the teeth of nonhuman primates systematically, by group." *Choice*

About the Author

Daris R. Swindler is Professor Emeritus of Anthropology at the University of Washington, Seattle. His main research interests are in primate anatomy and dental studies of early primate dental development, comparative dental morphology and odontometrics of living and fossil primates, and Pacific dental anthropology. He has written or edited nine previous books including *An Atlas of Primate Gross Anatomy: Baboon, Chimpanzee, and Man* (with C. D. Wood, 1973), *The Dentition of Living Primates* (1976), *Systematics, Evolution and Anatomy: Comparative Primate Biology Volume 1* (with J. Erwin, 1986), *Paleontologia Umana, Evoluzione, Addamento, Cultura* (with A. Drusini, 1996), and *Introduction to the Primates* (1998).

Users Review

From reader reviews:

Charles Settles:

Reading a reserve can be one of a lot of activity that everyone in the world likes. Do you like reading book and so. There are a lot of reasons why people love it.
