Chemical and Physical Behavior of Human Hair By Clarence R. Robbins

Human hair is the subject of a remarkably wide range of scientific investigations. Its chemical and physical properties are of importance to the cosmetics industry, forensic scientists and to biomedical researchers. The fifth edition of this book confirms its position as the definitive monograph on the subject. Previous editions were recognized as “concise and thorough” (Journal of the American Chemical Society), “an invaluable resource” (Canadian Forensic Science Society Journal), and “highly recommended” (Textile Research Journal). Chemical and Physical Behavior of Human Hair is a teaching guide and reference volume for cosmetic chemists and other scientists in the hair products industry, academic researchers studying hair and hair growth, textile scientists and forensic specialists.

Features of the Fifth Edition:

Recent advances in the classification and characterization of the different proteins and genes in IF and keratin associated proteins in human hair are described.

The mechanism and incidence of hair growth and loss and hair density vs. age of males & females are described for Asians, Caucasians and Africans in different scalp regions.

Details of hair surface lipids and cuticle membranes provide a better understanding of the surface and organization of the CMC and its involvement in stress strain is presented.

Recent evidence demonstrates a more bilateral structure in curly hair and a more concentric arrangement of different cortical proteins in straighter hair.

SNPs involved in hair form (curl and coarseness) and pigmentation and genes in alopecia and hair abnormalities are described.

The latest biosynthetic scheme for hair pigments and structures for these and the different response of red versus brown-black pigments to photodegradation is described.

A new method for curvature on 2,400 persons from different countries and groups is used to assign curvature throughout this book.

Additional data for age and effects on diameter, ellipticity, elastic modulus, break stress and other parameters are presented with much larger data sets featuring statistical analyses.

Hair conditioning, strength, breakage, split ends, flyaway, shine, combing ease, body, style retention, manageability and feel parameters are defined and described.

A new section of different life stages by age groups considering collective and individual changes in hair fiber properties with age and how these affect assembly properties.

Users Review

From reader reviews:

Terrance Allen:

Spent a free a chance to be fun activity to do! A lot of people spent their down time with their family, or their friends. Usually they undertaking activity like watching television, likely to beach, or picnic inside the park.

They actually doing same thing every week. Do you feel it? Would you like to something different to fill your free time/ holiday? May be reading a book can be option to fill your totally free time/ holiday. The first thing you ask may be what kinds of e-book that you should read. If you want to consider look for book, may be the book untitled Chemical and Physical Behavior of Human Hair can be fine book to read. May be it might be best activity to you.

Thomas Jones:

The reason why? Because this Chemical and Physical Behavior of Human Hair is an unordinary book that the inside of the book waiting for you to snap that but latter it will shock you with the secret it inside. Reading this book adjacent to it was fantastic author who else write the book in such amazing way makes the content inside easier to understand, entertaining technique but still convey the meaning entirely. So , it is good for you for not hesitating having this nowadays or you going to regret it. This phenomenal book will give you a lot of advantages than the other book have such as help improving your skill and your critical thinking technique. So , still want to hold off having that book? If I were you I will go to the publication store hurriedly.

Wanda Collins:

Are you kind of busy person, only have 10 or maybe 15 minute in your morning to upgrading your mind expertise or thinking skill perhaps analytical thinking? Then you are receiving problem with the book in comparison with can satisfy your limited time to read it because all of this time you only find book that need more time to be examine. Chemical and Physical Behavior of Human Hair can be your answer because it can be read by an individual who have those short spare time problems.

Karen Huff:

This Chemical and Physical Behavior of Human Hair is brand new way for you who has intense curiosity to look for some information as it relief your hunger of knowledge. Getting deeper you upon it getting knowledge more you know otherwise you who still having little digest in reading this Chemical and Physical Behavior of Human Hair can be the light food for you because the information inside that book is easy to get through anyone. These books acquire itself in the form which can be reachable by anyone, that's why I mean in the e-book type. People who think that in publication form make them feel tired even dizzy this e-book is the answer. So there is absolutely no in reading a reserve especially this one. You can find actually looking for. It should be here for you. So , don't miss the item! Just read this e-book kind for your better life and knowledge.
