This package includes the Enhanced Pearson eText and the loose-leaf version.

Help all Pre-K-8 learners make sense of math

Written by leaders in the field, *Elementary and Middle School Mathematics: Teaching Developmentally* helps teacher candidates develop a real understanding of the mathematics they will teach and the most effective methods of teaching Pre-K-8 math topics. This text reflects the Common Core State Standards and NCTM's *Principles to Actions*, as well as current research. Emphasis is placed on teaching math conceptually, in a problem-based, developmentally appropriate manner that supports the learning needs of all students. Pause and Reflect prompts and Activities engage pre-service teachers as they bolster their own knowledge of the math. Classroom videos and examples of real student work allow teacher candidates to *visualize* good mathematics instruction and assessment. An important reference to consult throughout a teaching career, this book helps teachers and their students experience the excitement that happens when math makes sense. The Enhanced Pearson eText features embedded video, assessments, and clickable Activity Sheets and Blackline Masters.

Improve mastery and retention with the Enhanced Pearson eText*

The Enhanced Pearson eText provides a rich, interactive learning environment designed to improve student mastery of content. The Enhanced Pearson eText is:

- **Engaging.** The new interactive, multimedia learning features were developed by the authors and other subject-matter experts to deepen and enrich the learning experience.
- **Convenient.** Enjoy instant online access from your computer or download the Pearson eText App to read on or offline on your iPad® and Android® tablet.*

- **Affordable.** Experience the advantages of the Enhanced Pearson eText along with all the benefits of print for 40% to 50% less than a print bound book.

* *The Enhanced eText features are only available in the Pearson eText format. They are not available in third-party eTexts or downloads.*

**The Pearson eText App is available on Google Play and in the App Store. It requires Android OS 3.1-4, a 7" or 10" tablet, or iPad iOS 5.0 or later.*

Editorial Review

From the Back Cover

Help all Pre-K-8 learners make sense of math

Written by leaders in the field, *Elementary and Middle School Mathematics: Teaching Developmentally* helps teacher candidates develop a real understanding of the mathematics they will teach and the most effective methods of teaching Pre-K-8 math topics. This text reflects the Common Core State Standards and NCTM's *Principles to Actions*, as well as current research. Emphasis is placed on teaching math conceptually, in a problem-based, developmentally appropriate manner that supports the learning needs of all students. Pause and Reflect prompts and Activities engage pre-service teachers as they bolster their own knowledge of the math. Classroom videos and examples of real student work allow teacher candidates to *visualize* good mathematics instruction and assessment. An important reference to consult throughout a teaching career, this book helps teachers and their students experience the excitement that happens when math makes sense.

Invigorate learning with the Enhanced Pearson eText

The Enhanced Pearson eText provides a rich, interactive learning environment designed to improve student mastery of content with the following multimedia features:

- ***Embedded videos*** of mathematics teaching, learning, and assessing illustrate authentic, effective, teaching and assessment practices. Videos expand the topics presented in the text, and can be viewed independently or as a full class.
- ***Embedded Self-Checks with feedback to give readers a chance to test their knowledge of each section and chapter. The Self-Checks also increase student interactivity as they read.***
- ***Activity Sheets and Blackline Masters*** are just a click away, making it even easier for instructors and students to use the Activities in the book. These classroom-ready handouts can be used in a methods class or school settings.
- ***Expanded Lessons*** focus on concepts central to elementary and middle school mathematics and include NCTM and CCSSO grade-level recommendations, adaptation suggestions for English language learners (ELLs) and students with special needs, and formative assessment suggestions. Every chapter in Section II has at least one Expanded Lesson linked to an Activity.

About the Author

John A. Van de Walle was a professor emeritus at Virginia Commonwealth University. He was a leader in mathematics education who regularly offered professional development workshops for K–8 teachers in the United States and Canada focused on mathematics instruction that engaged students in mathematical reasoning and problem solving. He visited many classrooms and worked with teachers to implement student-centered math lessons. He co-authored the Scott Foresman–Addison Wesley *Mathematics K–6* series and contributed to the original Pearson School mathematics program enVisionMATH. Additionally, John was very active in the National Council of Teachers of Mathematics (NCTM), writing book chapters and journal articles, serving on the board of directors, chairing the educational materials committee, and speaking at national and regional meetings.

Karen S. Karp is a professor of mathematics education at the University of Louisville in Kentucky. Prior to

entering the field of teacher education she was an elementary school teacher in New York. Karen is the volume editor of *Annual Perspectives in Mathematics Education: Using Research to Improve Instruction* and is the co-author of *Developing Essential Understanding of Addition and Subtraction for Teaching Mathematics in Pre-K-Grade 2*, *Discovering Lessons for the Common Core State Standards in Grades K-5* and *Putting Essential Understanding of Addition and Subtraction into Practice Pre-K – Grade 2*. She is a former member of the Board of Directors of the National Council of Teachers of Mathematics and a former president of the Association of Mathematics Teacher Educators. She continues to work in classrooms with teachers of students with disabilities.

Jennifer M. Bay-Williams is a professor of mathematics education at the University of Louisville in Kentucky. Jennifer taught elementary, middle, and high school in Missouri and in Peru, and continues to work in classrooms at all levels with students and with teachers. Jennifer has published many articles on teaching and learning in NCTM journals. She has also authored and co-authored numerous books, including: *Developing Essential Understanding of Addition and Subtraction for Teaching Mathematics in Pre-K-Grade 2*, *Math and Literature: Grades 6-8*, *Math and Nonfiction: Grades 6-8*, *Navigating through Connections in Grades 6-8*, *Mathematics Coaching: Resources and Tools for Coaches and Other Leaders*. Jennifer is on the Board of Directors for the National Council of Teachers of Mathematics (NCTM), and has previously served on the Board of Directors for TODOS: Equity for All and as secretary and president for the Association of Mathematics Teacher Educators (AMTE).

Users Review

From reader reviews:

Wendy Brame:

Reading a book can be one of a lot of exercise that everyone in the world really likes. Do you like reading book and so. There are a lot of reasons why people love it. First reading a e-book will give you a lot of new info. When you read a publication you will get new information due to the fact book is one of many ways to share the information or even their idea. Second, studying a book will make a person more imaginative. When you examining a book especially fiction book the author will bring someone to imagine the story how the character types do it anything. Third, you are able to share your knowledge to other people. When you read this Elementary and Middle School Mathematics: Teaching Developmentally, it is possible to tells your family, friends in addition to soon about yours book. Your knowledge can inspire different ones, make them reading a publication.

Lawrence Rowe:

Spent a free time for you to be fun activity to do! A lot of people spent their leisure time with their family, or all their friends. Usually they doing activity like watching television, about to beach, or picnic in the park. They actually doing same thing every week. Do you feel it? Will you something different to fill your current free time/ holiday? May be reading a book is usually option to fill your no cost time/ holiday. The first thing you ask may be what kinds of reserve that you should read. If you want to consider look for book, may be the publication untitled Elementary and Middle School Mathematics: Teaching Developmentally can be good book to read. May be it could be best activity to you.

Ashley Parra:

This Elementary and Middle School Mathematics: Teaching Developmentally is completely new way for you who has fascination to look for some information because it relief your hunger of knowledge. Getting deeper you upon it getting knowledge more you know otherwise you who still having small amount of digest in reading this Elementary and Middle School Mathematics: Teaching Developmentally can be the light food for you because the information inside this kind of book is easy to get by means of anyone. These books acquire itself in the form that is certainly reachable by anyone, yep I mean in the e-book web form. People who think that in book form make them feel drowsy even dizzy this publication is the answer. So there is not any in reading a reserve especially this one. You can find what you are looking for. It should be here for anyone. So , don't miss that! Just read this e-book kind for your better life and also knowledge.

Warner Samuels:

That publication can make you to feel relax. This book Elementary and Middle School Mathematics: Teaching Developmentally was colorful and of course has pictures on the website. As we know that book Elementary and Middle School Mathematics: Teaching Developmentally has many kinds or type. Start from kids until teens. For example Naruto or Private investigator Conan you can read and believe that you are the character on there. So , not at all of book are generally make you bored, any it offers you feel happy, fun and loosen up. Try to choose the best book for you personally and try to like reading this.
