Lipid Disorders: A Multidisciplinary Approach, 1e (Clinics Collections), 1e

By Joel J. Heidelbaugh MD

Clinics Collections: Lipid Disorders draws from Elsevier's robust Clinics Review Articles database to provide multidisciplinary teams, including general practitioners, cardiologists, endocrinologists, pathologists, cardiologists, rheumatologists, and hepatologists, with practical clinical advice and insights on this highly prevalent condition and its comorbidities. Clinics Collections: Lipid Disorders guides readers on how to apply current primary research findings on lipid disorders to everyday practice to help overcome challenges and complications, keep up with new and improved treatment methods, and improve patient outcomes.

- Areas of focus include lipids and biomarkers, lipids and pharmacotherapy, lipids and heart disease, lipids and chronic disease, lipids and pediatrics, lipids and women's health and special considerations.
- Each article begins with keywords and key points for immediate access to the most critical information.
- Articles are presented in an easy-to-digest and concisely worded format.

Elsevier's Clinics Collections provide concise reviews of today's most prevalent conditions and significant medical developments. Other Clinics Collections titles available include Type II Diabetes Mellitus, Asthma, Obesity, and Pain Management

Editorial Review

Review

"[Lipid Disorders: A Multidisciplinary Approach] is intended as a reference of the current, research-based practice guidelines in the management of patients with multiple types of lipid disorders. This book would be helpful to all physicians, but most specifically internists, endocrinologists, and cardiologists at all levels of training. This is an essential guide that describes the relationship lipids have with their biomarkers, women's health, pediatrics, chronic diseases, and, of course, heart disease. It parses the most current clinical data in a manner that relates directly to the most common lipid disorders. Numerous graphics and tables complement the text very well. This is an excellent reference for providers in the many specialties that are involved in the management of patients with lipid disorders. It describes the current guideline-based therapy and the clinical data from which it is derived." -- 3 Stars! -- **Samy Abdelghani, MD (Ochsner Clinic Foundation), for Doody's Review Service.**

Users Review

From reader reviews:

Karen Imes:

Spent a free time to be fun activity to complete! A lot of people spent their sparetime with their family, or their particular friends. Usually they doing activity like watching television, about to beach, or picnic from the park. They actually doing same thing every week. Do you feel it? Will you something different to fill your own personal free time/ holiday? Could possibly be reading a book can be option to fill your no cost time/ holiday.
