Text Analysis Pipelines: Towards Ad-hoc Large-Scale Text Mining (Lecture Notes in Computer Science) By Henning Wachsmuth

This monograph proposes a comprehensive and fully automatic approach to designing text analysis pipelines for arbitrary information needs that are optimal in terms of run-time efficiency and that robustly mine relevant information from text of any kind. Based on state-of-the-art techniques from machine learning and other areas of artificial intelligence, novel pipeline construction and execution algorithms are developed and implemented in prototypical software. Formal analyses of the algorithms and extensive empirical experiments underline that the proposed approach represents an essential step towards the ad-hoc use of text mining in web search and big data analytics.

Both web search and big data analytics aim to fulfill peoples' needs for information in an adhoc manner. The information sought for is often hidden in large amounts of natural language text. Instead of simply returning links to potentially relevant texts, leading search and analytics engines have started to directly mine relevant information from the texts. To this end, they execute text analysis pipelines that may consist of several complex information-extraction and text-classification stages. Due to practical requirements of efficiency and robustness, however, the use of text mining has so far been limited to anticipated information needs that can be fulfilled with rather simple, manually constructed pipelines.

Editorial Review

Users Review

From reader reviews:

Stacey Lawrence:

This Text Analysis Pipelines: Towards Ad-hoc Large-Scale Text Mining (Lecture Notes in Computer Science) tend to be reliable for you who want to be a successful person, why. The reason of this Text Analysis Pipelines: Towards Ad-hoc Large-Scale Text Mining (Lecture Notes in Computer Science) can be on the list of great books you must have is giving you more than just simple looking at food but feed a person with information that probably will shock your preceding knowledge. This book is handy, you can bring it everywhere and whenever your conditions throughout the e-book and printed ones. Beside that this Text Analysis Pipelines: Towards Ad-hoc Large-Scale Text Mining (Lecture Notes in Computer Science) forcing you to have an enormous of experience for example rich vocabulary, giving you trial of critical thinking that we understand it useful in your day task. So , let's have it and revel in reading.

Trina Durham:

Reading can called brain hangout, why? Because if you are reading a book specially book entitled Text Analysis Pipelines: Towards Ad-hoc Large-Scale Text Mining (Lecture Notes in Computer Science) your head will drift away trough every dimension, wandering in each aspect that maybe not known for but surely can be your mind friends. Imaging each and every word written in a guide then become one application form conclusion and explanation that will maybe you never get ahead of. The Text Analysis Pipelines: Towards Ad-hoc Large-Scale Text Mining (Lecture Notes in Computer Science) giving you a different experience more than blown away your mind but also giving you useful info for your better life in this particular era. So now let us teach you the relaxing pattern the following is your body and mind will be pleased when you are finished looking at it, like winning a. Do you want to try this extraordinary paying spare time activity?

Gerald Reed:

In this era globalization it is important to someone to find information. The information will make anyone to understand the condition of the world. The healthiness of the world makes the information better to share. You can find a lot of references to get information example: internet, magazine, book, and soon. You can view that now, a lot of publisher that print many kinds of book. Often the book that recommended to you personally is Text Analysis Pipelines: Towards Ad-hoc Large-Scale Text Mining (Lecture Notes in Computer Science) this publication consist a lot of the information with the condition of this world now. This particular book was represented just how can the world has grown up. The vocabulary styles that writer require to explain it is easy to understand. Often the writer made some analysis when he makes this book. Here is why this book acceptable all of you.

Christie Rich:

Many people spending their time period by playing outside with friends, fun activity using family or just watching TV the entire day. You can have new activity to invest your whole day by studying a book. Ugh, do you consider reading a book can really hard because you have to bring the book everywhere? It all right you can have the e-book, taking everywhere you want in your Smart phone. Like Text Analysis Pipelines: Towards Ad-hoc Large-Scale Text Mining (Lecture Notes in Computer Science) which is getting the e-book version. So , why not try out this book? Let's see.
