Handbook of Porphyrin Science (Volumes 31-35): With Applications to Chemistry, Physics, Materials Science, Engineering, Biology and Medicine By Karl M Kadish

This is the seventh set of Handbook of Porphyrin Science.

Porphyrins, phthalocyanines and their numerous analogue and derivatives are materials of tremendous importance in chemistry, materials science, physics, biology and medicine. They are the red color in blood (heme) and the green in leaves (chlorophyll); they are also excellent ligands that can coordinate with almost every metal in the Periodic Table. Grounded in natural systems, porphyrins are incredibly versatile and can be modified in many ways; each new modification yields derivatives, demonstrating new chemistry, physics and biology, with a vast array of medicinal and technical applications.

As porphyrins are currently employed as platforms for study of theoretical principles and applications in a wide variety of fields, the Handbook of Porphyrin Science represents a timely ongoing series dealing in detail with the synthesis, chemistry, physicochemical and medical properties and applications of polypyrrole macrocycles. Professors Karl Kadish, Kevin Smith and Roger Guilard are internationally recognized experts in the research field of porphyrins, each having his own separate area of expertise in the field. Between them, they have published over 1500 peer-reviewed papers and edited more than three dozen books on diverse topics of porphyrins and phthalocyanines. In assembling the new volumes of this unique handbook, they have selected and attracted the very best scientists in each sub-discipline as contributing authors.

This handbook will prove to be a modern authoritative treatise on the subject as it is a collection of up-to-date works by world-renowned experts in the field. Complete with hundreds of figures, tables and structural formulas, and thousands of literature citations, all researchers and graduate students in this field will find the Handbook of Porphyrin Science an essential, major reference source for many years to come.

Readership: Chemists, physicists, material scientists, polymer scientists, spectroscopists, electrochemists, electronics and photonics engineers, biochemists, biophysicists, medicinal chemists and clinicians.

Editorial Review

From the Inside Flap

Porphyrins, phthalocyanines and their numerous analogue and derivatives are materials of tremendous importance in chemistry, materials science, physics, biology and medicine. They are the red color in blood (heme) and the green in leaves (chlorophyll); they are also excellent ligands that can coordinate with almost every metal in the Periodic Table. Grounded in natural systems, porphyrins are incredibly versatile and can be modified in many ways; each new modification yields derivatives, demonstrating new chemistry, physics and biology, with a vast array of medicinal and technical applications.

As porphyrins are currently employed as platforms for study of theoretical principles and applications in a wide variety of fields, the Handbook of Porphyrin Science represents a timely ongoing series dealing in detail with the synthesis, chemistry, physicochemical and medical properties and applications of polypyrrole macrocycles. Professors Karl Kadish, Kevin Smith and Roger Guilard are internationally recognized experts in the research field of porphyrins, each having his own separate area of expertise in the field. Between them, they have published over 1500 peer-reviewed papers and edited more than three dozen books on diverse topics of porphyrins and phthalocyanines. In assembling the new volumes of this unique handbook, they have selected and attracted the very best scientists in each sub-discipline as contributing authors.

This handbook will prove to be a modern authoritative treatise on the subject as it is a collection of up-to-date works by world-renowned experts in the field. Complete with hundreds of figures, tables and structural formulas, and thousands of literature citations, all researchers and graduate students in this field will find the Handbook of Porphyrin Science an essential, major reference source for many years to come.

About the Author

Karl M Kadish is a Hugh Roy and Lillie Cranz Cullen University Professor at the University of Houston. He received his PhD from Pennsylvania State University and was a postdoctoral fellow at the University of New Orleans and a Charge de Recherche at the University of Paris VI. Dr Kadish's research interests are in analytical chemistry, porphyrin chemistry, chemistry and electrochemistry of biological compounds, redox reactions of metal complexes, spectroelectrochemistry and fullerene chemistry. He has published over 540 research papers and edited or co-edited 70 books. Dr Kadish has been the Editor-in-Chief of the Journal of Porphyrins and Phthalocyanines since 2003 and has also served as President of the Society of Porphyrins and Phthalocyanines since 2000.

Kevin M Smith is the LSU Foundation James C. Bolton Distinguished Professor of Chemistry in Louisiana State University. Dr. Smith has received the Corday-Morgan Medal and Prize from the Royal Society of Chemistry, UK, the Alfred Bader Award in Bioorganic or Bioorganic Chemistry from the American Chemical Society, USA, and the Robert Burns Woodward Career Achievement Award from the Society of Porphyrins and Phthalocyanines. He has more than 750 publications, has edited or coedited 57 books on the topics of porphyrins and related molecules, and has been awarded eight patents.

Roger Guilard is Professor of Chemistry at the University of Burgundy in France. He received his PhD from the University of Dijon and was a postdoctoral fellow at the University of Basel and Darmstadt. He has been the recipient of the Coordination Chemistry Award from the French Chemical Society and of two Awards from the French Academy of Sciences. He received the "Grand Prix de l'Académie des Sciences", "Prix Gaz de France" in 2001 and the "Robert Burns Woodward Career Award in Porphyrin Chemistry" in

2010. He was elected as a fellow of the European Academy of Sciences in 2011. He has published over 450 papers and reviews and has been awarded 22 patents in the area of heterocyclic chemistry, organometallic chemistry and coordination chemistry. He has contributed to the creation of two specialized chemical companies in the synthesis of macrocycles. He edited and co-edited 52 books which are devoted to the topics of porphyrins and related molecules.

Users Review

From reader reviews:

Willette Bickel:

Have you spare time for just a day? What do you do when you have considerably more or little spare time? Yes, you can choose the suitable activity to get spend your time. Any person spent their particular spare time to take a wander, shopping, or went to the particular Mall. How about open or perhaps read a book allowed Handbook of Porphyrin Science (Volumes 31-35): With Applications to Chemistry, Physics, Materials Science, Engineering, Biology and Medicine? Maybe it is to become best activity for you. You recognize beside you can spend your time together with your favorite's book, you can more intelligent than before. Do you agree with their opinion or you have various other opinion?

Vickie Duke:

The book Handbook of Porphyrin Science (Volumes 31-35): With Applications to Chemistry, Physics, Materials Science, Engineering, Biology and Medicine give you a sense of feeling enjoy for your spare time. You should use to make your capable far more increase. Book can being your best friend when you getting anxiety or having big problem with the subject. If you can make looking at a book Handbook of Porphyrin Science (Volumes 31-35): With Applications to Chemistry, Physics, Materials Science, Engineering, Biology and Medicine to get your habit, you can get more advantages, like add your own personal capable, increase your knowledge about many or all subjects. You are able to know everything if you like open and read a reserve Handbook of Porphyrin Science (Volumes 31-35): With Applications to Chemistry, Physics, Materials Science, Engineering, Biology and Medicine. Kinds of book are a lot of. It means that, science reserve or encyclopedia or other individuals. So , how do you think about this publication?

Jennifer Valdovinos:

Are you kind of hectic person, only have 10 or 15 minute in your time to upgrading your mind skill or thinking skill also analytical thinking? Then you have problem with the book compared to can satisfy your short space of time to read it because this time you only find reserve that need more time to be go through. Handbook of Porphyrin Science (Volumes 31-35): With Applications to Chemistry, Physics, Materials Science, Engineering, Biology and Medicine can be your answer given it can be read by a person who have those short extra time problems.

Jose Chapman:

As we know that book is vital thing to add our expertise for everything. By a book we can know everything

we want. A book is a group of written, printed, illustrated or maybe blank sheet. Every year was exactly added. This book Handbook of Porphyrin Science (Volumes 31-35): With Applications to Chemistry, Physics, Materials Science, Engineering, Biology and Medicine was filled in relation to science. Spend your free time to add your knowledge about your science competence. Some people has various feel when they reading a new book. If you know how big good thing about a book, you can sense enjoy to read a e-book. In the modern era like at this point, many ways to get book that you simply wanted.
