### Goods, Power, History: Latin America's Material Culture (New Approaches to the Americas) By Arnold J. Bauer

This book is an original exploration into the history of material culture and consumption in Latin America over the past 500 years with special attention to the categories of food, clothing, shelter, and the arrangement of public and private space. The practice of consumption is related to supply and demand but also to the importance of ritual and the scramble for identity within the ethnic and class arrangements imposed by colonial and postcolonial societies.

"This is a tremendously entertaining yet knowledgeable interpretation of Latin American history viewed through the lens of material culture.... "Arnold Bauer offers us a beautifully composed and sweeping overview of the past thousand years of Latin American history, the present included, from the vantage of its "material culture."
