Arduino Programming in 24 Hours, Sams Teach Yourself By Richard Blum

In just 24 sessions of one hour or less, *Sams Teach Yourself Arduino Programming in 24 Hours* teaches you C programming on Arduino, so you can start creating inspired “DIY” hardware projects of your own! Using this book’s straightforward, step-by-step approach, you’ll walk through everything from setting up your programming environment to mastering C syntax and features, interfacing your Arduino to performing full-fledged prototyping. Every hands-on lesson and example builds on what you’ve already learned, giving you a rock-solid foundation for real-world success!

Step-by-step instructions carefully walk you through the most common Arduino programming tasks.

Quizzes at the end of each chapter help you test your knowledge.

By the Way notes present interesting information related to the discussion.

Did You Know? tips offer advice or show you easier ways to perform tasks.

Watch Out! cautions alert you to possible problems and give you advice on how to avoid them.

Learn how to...

- Get the right Arduino hardware and accessories for your needs
- Download the Arduino IDE, install it, and link it to your Arduino
- Quickly create, compile, upload, and run your first Arduino program
- Master C syntax, decision control, strings, data structures, and functions
- Use pointers to work with memory—and avoid common mistakes
- Store data on your Arduino’s EEPROM or an external SD card
- Use existing hardware libraries, or create your own
- Send output and read input from analog devices or digital interfaces
- Create and handle interrupts in software and hardware
- Communicate with devices via the SPI interface and I2C protocol
- Work with analog and digital sensors
- Write Arduino C programs that control motors
- Connect an LCD to your Arduino, and code the output
- Install an Ethernet shield, configure an Ethernet connection, and write networking programs

- Create prototyping environments, use prototyping shields, and interface electronics to your Arduino

Editorial Review

About the Author

Richard Blum has worked in the IT industry for more than 25 years as a network and systems administrator, managing Microsoft, UNIX, Linux, and Novell servers for a network with more than 3,500 users. He has developed and teaches programming and Linux courses via the Internet to colleges and universities worldwide. Rich has a master's degree in management information systems from Purdue University and is the author of several programming books, including *Teach Yourself Python Programming for the Raspberry Pi in 24 Hours* (coauthored with Christine Bresnahan, 2013, Sams Publishing), *Linux Command Line and Shell Scripting Bible* (coauthored with Christine Bresnahan, 2011, Wiley), *Professional Linux Programming* (coauthored with Jon Masters, 2007, Wiley), and *Professional Assembly Language* (2005, Wrox). When he's not busy being a computer nerd, Rich enjoys spending time with his wife, Barbara, and two daughters, Katie Jane and Jessica.

Users Review

From reader reviews:

Dana Hanley:

In this 21st one hundred year, people become competitive in most way. By being competitive now, people have do something to make these survives, being in the middle of the actual crowded place and notice through surrounding. One thing that often many people have underestimated it for a while is reading. Yeah, by reading a book your ability to survive increase then having chance to stand up than other is high. For you personally who want to start reading the book, we give you this Arduino Programming in 24 Hours, Sams Teach Yourself book as nice and daily reading publication. Why, because this book is greater than just a book.

Roxanne Mazon:

Nowadays reading books be than want or need but also become a life style. This reading habit give you lot of advantages. The benefits you got of course the knowledge the particular information inside the book that improve your knowledge and information. The knowledge you get based on what kind of publication you read, if you want send more knowledge just go with education and learning books but if you want experience happy read one along with theme for entertaining such as comic or novel. The actual Arduino Programming in 24 Hours, Sams Teach Yourself is kind of book which is giving the reader capricious experience.

Robin Holloway:

In this age globalization it is important to someone to obtain information. The information will make anyone to understand the condition of the world. The fitness of the world makes the information much easier to share. You can find a lot of references to get information example: internet, paper, book, and soon. You can

observe that now, a lot of publisher that print many kinds of book. The book that recommended to you is Arduino Programming in 24 Hours, Sams Teach Yourself this guide consist a lot of the information in the condition of this world now. That book was represented just how can the world has grown up. The vocabulary styles that writer use to explain it is easy to understand. The actual writer made some investigation when he makes this book. That's why this book suitable all of you.

Bessie Starns:

As a college student exactly feel bored to reading. If their teacher requested them to go to the library in order to make summary for some guide, they are complained. Just minor students that has reading's heart and soul or real their leisure activity. They just do what the teacher want, like asked to the library. They go to right now there but nothing reading really. Any students feel that studying is not important, boring and also can't see colorful photographs on there. Yeah, it is to get complicated. Book is very important for yourself. As we know that on this period of time, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's country. Therefore this Arduino Programming in 24 Hours, Sams Teach Yourself can make you sense more interested to read.
