Imaging in Treatment Planning for Sinonasal Diseases (Medical Radiology)

From Brand: Springer

- Adopts an original approach in discussing the rationale underlying the treatment strategy and identifying the imaging findings critical to the decision-making process
- Considers all important sinonasal diseases
- Serves as an invaluable guide to the selection of imaging techniques- Pays special attention to selection of an endonasal or an external approach in surgical candidates
- Based on 15 years' experience in integrating clinical and radiological information

Editorial Review

Review

From Annals of Otolaryngology, Rhinology & Laryngology, Vol. 115 (2) -February 2006:

"Well-organized and numerous radiographic images, diagrams, and bullets facilitate navigation for potential board examination review or referencing. Beneficial also for any clinician who evaluates and diagnoses diseases in the nasal, sinus, or anterior skull base region."

From RAD Magazine, September 2006, by Dr. W.L. Wong:

"... I have no doubt that this volume will find its way on to the shelf of most radiologists with an interest in ENT radiology. It forms part of a top class radiology series with 'Imaging in Treatment Planning for Sinonasal Disease' to match the best."

"This book offers an extremely comprehensive review of the nose and paranasal sinuses. It is well written and provides a high level of detail on CT and MR imaging techniques, anatomy and pathologic findings. The images are of excellent quality and supplemented by detailed anatomic drawings and microscopic appearances. ... This book will be of interest not only to radiologists, but also to ENT and maxillofacial surgeons. I can highly recommend this book to you." (Kirsten Forbes, *Neuroradiology*, Vol. 48, 2006)

"This book provides a modern clinico-radiologic approach of the sinonasal diseases. ... the authors detailed the different pathologies in a very well illustrated and didactic manner. ... A detailed summary is placed in front of each chapter, allowing a very efficient lecture. ... It will be a precious tool for radiologists and ENT, head and neck and maxillofacial surgeons, either confirmed or in training." (J. P. Marie, *Surgical and Radiologic Anatomy*, Vol. 27 (6), 2005)

From the Back Cover

This book provides both basic and advanced information on the clinical presentation, imaging findings and treatment of sinonasal diseases. For each specific disease, the rationale underlying the treatment strategy is discussed and the imaging findings critical to the decision-making process are identified. This is an original approach and reflects the constant team effort at the editors' institute over the past 15 years to integrate clinical and radiological information with the aim of establishing the most appropriate treatment. Special emphasis is placed on the identification of clinical and imaging data that allow selection of an endonasal or an external approach in surgical candidates. The value of planning an integrated endoscopic and radiological follow-up in the different diseases is also thoroughly reviewed. Through the correlation of imaging with endoscopic or clinical findings, this book will enable radiologists to familiarise themselves with the "otorhinolaryngological world" and clinicians to understand more fully the significance of specific radiological findings. It will serve as an invaluable guide to the selection of imaging techniques.

About the Author

Roberto Maroldi M.D:

Born in Vicenza on January 14th, 1954, he graduated in Medicine from Padua University in 1979, He was resident at Verona Medical School, where he was board certified in Radiology in 1984. He began his career at the Department of Radiology at the University of Brescia in 1982 where he was appointed Associate Professor of Radiology in the year 2000.

Member of the Italian Society of Radiology, he was elected in the Board of the same Society (1994-1998). He is also member of the Italian Society of Neuroradiology, and of the European Society of Head and Neck Radiology. He has been elected Member of the Steering Committee of the ESHNR (1998-2003) and President Elect of the 14th Annual Meeting and Refresher Course of the ESHNR in 2001. He was also elected President of the Head and Neck Radiology Section of the Italian Society of Radiology (1996-2000). Member of the Scientific Education Subcommittee "Head and Neck Radiology" of the ECR (1996-2002).

Since the beginning of his career, head and neck radiology was the main interest. By mean of a continuous cooperation with the Otorhinolaryngologic Clinic of the University of Brescia, several aspects of CT and MR imaging have been subjects of analysis and publications. Among these, the most remarkable ones regard the analysis of normal and abnormal CT findings of the post-operative larynx, the imaging findings of cocaine midline destructive lesions, and the assessment of the role of MR in evaluating invasion of the mandible in oral cavity and oropharyngeal neoplasms.

Piero Nicolai was born in Mantova (Italy) November 12th, 1954. In 1979, he graduated in Medicine at Padua University. At the same University, he completed the residency program in Otolaryngology (1982) and subsequently in Oncology (1985). He began his career at the Department of Otolaryngology at the University of Brescia, where he was appointed Assistant Professor in 1986, Associate Professor in 1992, and Professor of Otolaryngology in 2001. At present, he is the Chairman of the Department of Pediatric Otolaryngology.

Dr. Nicolai is member of many national and international societies: Società Italiana di Otorinolaringologia e Chirurgia Cervico-Cefalica, Società Italiana di Otorinolaringologia Pediatrica, Società Italiana del Basicranio, European Laryngological Society, European Rhinologic Society, European Skull Base Society, American Academy of Otolaryngology – Head and Neck Surgery, and American Rhinologic Society.

Dr. Nicolai is the author of 80 scientific publications (26 in national and 54 in international journals), which are mainly focused on head and neck oncology and endoscopic sinus surgery. Most of the publications reflects the interest which along the years has been developed with the colleagues of the Department of Radiology of the University of Brescia in understanding clinical-radiological correlations in inflammatory as well as neoplastic diseases of the head and neck.

Users Review

From reader reviews:

Elena Sparrow:

Can you one of the book lovers? If yes, do you ever feeling doubt if you are in the book store? Aim to pick one book that you find out the inside because don't ascertain book by its protect may doesn't work here is difficult job because you are scared that the inside maybe not because fantastic as in the outside look likes. Maybe you answer might be Imaging in Treatment Planning for Sinonasal Diseases (Medical Radiology) why because the fantastic cover that make you consider regarding the content will not disappoint you actually. The inside or content is fantastic as the outside or maybe cover. Your reading 6th sense will directly guide you to pick up this book.

Nora Emerson:

This *Imaging in Treatment Planning for Sinonasal Diseases (Medical Radiology)* is a great guide for you because the content which can be full of information for you who all always deal with work and have to make decisions every minute. This particular book reveals its info accurately using great arrangement of words or we can claim no rambling sentences in it. So if you are reading it hurriedly you can have whole details in it. Doesn't mean it only offers you straight forward sentences but challenging core information with attractive delivering sentences. Having *Imaging in Treatment Planning for Sinonasal Diseases (Medical Radiology)* in your hand like finding the world in your arm, data in it is not a ridiculous one. We can say that no reserve that offer you world in ten or fifteen moments right but this book already does that. So, this really is a good reading book. Hi Mr. and Mrs. hectic do you still doubt this?

Gary Games:

Do you like reading a reserve? Confused to looking for your preferred book? Or your book ended up being rare? Why so many queries for the book? But any people feel that they enjoy to get reading. Some people likes studying, not only science book but in addition novel and *Imaging in Treatment Planning for Sinonasal Diseases (Medical Radiology)* or even others sources were given expertise for you. After you know how the great a book, you feel desire to read more and more. Science book was created for teacher as well as students especially. Those ebooks are helping them to put their knowledge. In other case, beside science book, any other book likes *Imaging in Treatment Planning for Sinonasal Diseases (Medical Radiology)* to make your spare time far more colorful. Many types of book like this one.

Kirk Nutter:

As a pupil exactly feel bored in order to reading. If their teacher asked them to go to the library or make summary for some reserve, they are complained. Just minor students that has reading's heart or real their hobby. They just do what the teacher want, like asked to go to the library. They go to right now there but nothing reading seriously. Any students feel that studying is not important, boring and can't see colorful images on there. Yeah, it is for being complicated. Book is very important for you personally. As we know that on this age, many ways to get whatever we really wish for. Likewise word says, ways to reach Chinese's country. So, this *Imaging in Treatment Planning for Sinonasal Diseases (Medical Radiology)* can make you feel more interested to read.
