

Theory and Applications of the Analytic Network Process: Decision Making with Benefits, Opportunities, Costs, and Risks

By Thomas L. Saaty

Theory and Applications of the Analytic Network Process: Decision Making with Benefits, Opportunities, Costs, and Risks By Thomas L. Saaty

The Analytic Hierarchy Process (AHP) and its generalization to dependence and feedback, the Analytic Network Process (ANP), are methods of relative measurement of tangibles and intangibles. Being able to derive such measurements is essential for making good decisions. This book is based on the Analytic Network Process and lays out a new approach for making decisions in light of their benefits, opportunities, costs and risks (BOCR) shows how to include the strategic criteria of the decision-maker that must be satisfied regardless of the particular decision being undertaken. This book includes all the important background material from the earlier book, The Analytic Network Process: Decision Making with Dependence and Feedback, published in 2001, and goes farther with new examples of estimating market share of companies based on the intangibles of customer perception, and new applications involving Benefits, Opportunities, Costs and Risks.

Editorial Review

About the Author

Thomas L. Saaty is a Distinguished University Professor at the University of Pittsburgh, where he teaches at the Pitt Graduate School of Business. He is best-known as being the modern mathematician who figured out a way to measure intangibles, and is the inventor, architect, and primary theoretician of the Analytic Hierarchy Process, a decision-making framework used for large-scale, multiparty, multi-criteria decision analysis, and of the Analytic Network Process, its generalization to decisions with dependence and feedback. Saaty is a member of National Academy of Engineering (2005), and in 2008 he received the Impact Prize from the Operations Research Society INFORMS for how the AHP has revolutionized the way we resolve complex decision problems. The publication of his books on the Analytic Hierarchy Process and the release of PC-based software such as SuperDecisions and web-based collaborative software such as Decision Lens have led to widespread dissemination of the process. The AHP has been applied worldwide to help decision makers in every conceivable decision context across both the public and private sectors, with literally thousands of reported applications.

Users Review

From reader reviews:

Jose Longoria:

A lot of people always spent their very own free time to vacation as well as go to the outside with them friends and family or their friend. Do you know? Many a lot of people spent many people free time just watching TV, as well as playing video games all day long. If you would like try to find a new activity here is look different you can read some sort of book. It is really fun for you personally. If you enjoy the book which you read you can spent 24 hours a day to reading a guide. The book Theory and Applications of the Analytic Network Process: Decision Making with Benefits, Opportunities, Costs, and Risks it is rather good to read. There are a lot of people that recommended this book. These people were enjoying reading this book. In the event you did not have enough space to deliver this book you can buy the actual e-book. You can m0ore very easily to read this book from the smart phone. The price is not too expensive but this book offers high quality.

Lois Maestas:

Reading can called head hangout, why? Because if you are reading a book particularly book entitled Theory and Applications of the Analytic Network Process: Decision Making with Benefits, Opportunities, Costs, and Risks your head will drift away trough every dimension, wandering in each and every aspect that maybe unidentified for but surely can become your mind friends. Imaging every word written in a e-book then become one type conclusion and explanation that will maybe you never get ahead of. The Theory and Applications of the Analytic Network Process: Decision Making with Benefits, Opportunities, Costs, and Risks giving you a different experience more than blown away your head but also giving you useful facts for your better life with this era. So now let us demonstrate the relaxing pattern here is your body and mind is going to be pleased when you are finished reading through it, like winning a game. Do you want to try this extraordinary paying spare time activity?

Michael Joslyn:

This Theory and Applications of the Analytic Network Process: Decision Making with Benefits, Opportunities, Costs, and Risks is great reserve for you because the content and that is full of information for you who all always deal with world and get to make decision every minute. This book reveal it facts accurately using great organize word or we can declare no rambling sentences inside. So if you are read this hurriedly you can have whole details in it. Doesn't mean it only gives you straight forward sentences but hard core information with splendid delivering sentences. Having Theory and Applications of the Analytic Network Process: Decision Making with Benefits, Opportunities, Costs, and Risks in your hand like obtaining the world in your arm, facts in it is not ridiculous one. We can say that no e-book that offer you world with ten or fifteen tiny right but this guide already do that. So , this is good reading book. Heya Mr. and Mrs. active do you still doubt this?

Grady Meraz:

Reading a book to become new life style in this yr; every people loves to study a book. When you go through a book you can get a lot of benefit. When you read books, you can improve your knowledge, due to the fact book has a lot of information in it. The information that you will get depend on what forms of book that you have read. If you would like get information about your review, you can read education books, but if you want to entertain yourself you can read a fiction books, these kinds of us novel, comics, and soon. The Theory and Applications of the Analytic Network Process: Decision Making with Benefits, Opportunities, Costs, and Risks offer you a new experience in looking at a book.
