Advances in Psychophysiology: Vol 4 By J. Richard Jennings, Patrick K. Ackles

The series "Advances in Psycho-physiology" focuses on topics of contemporary interest to psychologists and emphasis is given to critical reviews and synthesis of both basic and applied psychophysiological research. Psychophysiology as a scientific discipline is concerned with the theoretical and empirical relationships between bodily processes and psychological factors. The spectrum covered is increasingly broad and includes topics such as cognition, human factors, artificial intelligence, emotion, personality, sleep, ageing, psychopathology, behavioural medicine, developmental disabilities, infant and child development, lie detection and biofeedback.
