**Computer Integrated Manufacturing (3rd Edition)** By James A. Rehg, Henry W. Kraebber

The book presents computer integrated manufacturing as an integral element of the entire manufacturing process, describing its relation to product and process design issues; computer-based process control and automation; operations and information systems for manufacturing; quality; and human considerations. This book delves into the manufacturing enterprise, the design elements and production engineering, controlling the enterprise resources, and enabling processes and systems for modern manufacturing. Professionals preparing for the APICS certification exams.

**Note:** This title does not include a CD-ROM.

### Editorial Review

From the Publisher

Vital to today's manufacturing processes, this book shows how CIM fits into the current manufacturing systems and how the technology is used to solve real-world industrial problems. This is the only technology level text in Computer-Integrated Manufacturing.

From the Back Cover

Understanding the operation of a comprehensive CIM solution requires knowledge of traditional manufacturing practices, a look at the current state of CIM, and consideration of how technology and operating procedures may change in the future. The integration of product design techniques and manufacturing fundamental principles, along with a look at changing operations and information systems that support CIM throughout the enterprise, make *Computer-Integrated Manufacturing* unique. This text is written to provide the technologist or engineer with a complete overview of the computer-integrated enterprise. It effectively accomplishes this goal by:

- describing the different types of manufacturing systems or production strategies used by industries worldwide, and showing how the technology is used to solve actual industrial problems
- going beyond the description of automated machines and software solutions to discuss *all* factors necessary for a successful CIM implementation
- discussing the impact of CIM on all major elements of an enterprise—product design, shop floor technology, and manufacturing production and operational control systems
- providing a convincing argument for implementing CIM so that the enterprise will be competitive in the global market

About the Author

**James A. Rehg, CMfgE**, is an Associate Professor of Engineering at Penn State Altoona, where he teaches automation controls courses in the BS program in Electromechanical Engineering Technology. He earned both a Bachelor of Science degree and a Master of Science degree in Electrical Engineering from St. Louis University and has completed additional graduate study at Wentworth Institute, University of Missouri, South Dakota School of Mines and Technology, and Clemson University. Before coming to Penn State Altoona, he was the CIM coordinator and department head of CAD/CAM/Machine Tool Technology at Tri-County Technical College. Prior to that, he was the Dean of Engineering Technology and Director of Academic Computing at Trident Technical College in Charleston, South Carolina. He held the position of Director of the Robotics Resource Center at Piedmont Technical College in Greenwood, South Carolina, and was department head of Electronic Engineering Technology of Forest Park Community College in St. Louis, Missouri. In addition, he was a Senior Instrumentation Engineer for Boeing in St. Louis. Professor Rehg has authored five texts on robotics and automation and has presented numerous papers on subjects related directly to training in automation and robotics. He has also been a consultant to nationally recognized corporations and many educational institutions. He has led numerous seminars and workshops in the areas of robotics and microprocessors and has developed extensive seminar training material. In addition, he has received numerous state awards for excellence in teaching and was named the outstanding instructor in the nation by the Association of Community College Trustees.

**Henry W. Kraebber, PE, CPIM**, is a Professor of Mechanical Engineering Technology at Purdue University in West Lafayette, Indiana. He has fifteen years of experience and leadership in manufacturing operations, engineering, quality, and management. He has worked at the Collins Avionics and Missiles group of Rockwell International, the Plough Products Division of Schering-Plough Corporation, and Flavorite Laboratories, Inc. His work has supported the production of industrial, consumer, and military products in the food, consumer products, and electronics areas. He currently teaches courses in manufacturing operations, manufacturing quality control, and integrated systems in the Computer-Integrated Manufacturing Technology degree program. Mr. Kraebber earned a Bachelor of Science degree in Industrial Engineering from Purdue University and a Master of Engineering degree in Industrial Engineering from Iowa State University. He is President of the CIM in Higher Education (CIM/HE) Alliance, a nonprofit corporation that supports CIM and manufacturing education. He is a senior member of the Society of Manufacturing Engineers (SME) and the Institute of Industrial Engineers (IIE). He is an active member of the American Production and Inventory Control Society (APICS) and has served as President and Vice President of Education for the Wabash Valley Chapter.

## **Users Review**

### **From reader reviews:**

#### **Carol Castaneda:**

This book untitled Computer Integrated Manufacturing (3rd Edition) to be one of several books which best seller in this year, that's because when you read this guide you can get a lot of benefit onto it. You will easily to buy this particular book in the book retailer or you can order it by means of online. The publisher on this book sells the e-book too. It makes you more readily to read this book, as you can read this book in your Mobile phone. So there is no reason for your requirements to past this publication from your list.

#### **James Dorman:**

Your reading sixth sense will not betray an individual, why because this Computer Integrated Manufacturing (3rd Edition) guide written by well-known writer we are excited for well how to make book which might be understand by anyone who also read the book. Written within good manner for you, dripping every ideas and composing skill only for eliminate your own hunger then you still hesitation Computer Integrated Manufacturing (3rd Edition) as good book not just by the cover but also from the content. This is one e-book that can break don't determine book by its cover, so do you still needing a different sixth sense to pick this kind of!? Oh come on your reading through sixth sense already said so why you have to listening to a different sixth sense.

#### **Cleveland Wheeler:**

Is it an individual who having spare time then spend it whole day by simply watching television programs or just telling lies on the bed? Do you need something new? This Computer Integrated Manufacturing (3rd Edition) can be the answer, oh how comes? A fresh book you know. You are thus out of date, spending your free time by reading in this completely new era is common not a geek activity. So what these publications have than the others?

**David Rutherford:**

That book can make you to feel relax. This book Computer Integrated Manufacturing (3rd Edition) was multi-colored and of course has pictures on there. As we know that book Computer Integrated Manufacturing (3rd Edition) has many kinds or style. Start from kids until young adults. For example Naruto or Investigation company Conan you can read and think that you are the character on there. So , not at all of book are usually make you bored, any it offers up you feel happy, fun and unwind. Try to choose the best book to suit your needs and try to like reading which.
