**Essentials of Conservation Biology, Sixth Edition** By Richard B. Primack

Essentials of Conservation Biology, Sixth Edition combines theory and applied and basic research to explain the connections between conservation biology and ecology, climate change biology, the protection of endangered species, protected area management, environmental economics, and sustainable development. A major theme throughout the book is the active role that scientists, local people, the general public, conservation organizations, and governments can play in protecting biodiversity, even while providing for human needs. Each chapter begins with general ideas and principles, which are illustrated with choice examples from the current literature. The most instructive examples are discussed in boxes highlighting projects, species, and issues of particular significance. Chapters end with summaries, an annotated list of suggested readings, and discussion questions. This new edition comes with extensive summary statements in the text margins, as study aids. Essentials of Conservation Biology, Sixth Edition is beautifully illustrated in full colour, and is written in clear, non-technical language, making it well-suited for undergraduate courses.

### Editorial Review

#### Review

"*Essentials of Conservation Biology* does have a lot to offer and is a well-written text, with current examples up to and including papers from 2014. Terms are well defined in the text, and the history of conservation biology as a field is well explained. Chapters are engaging and well thought out, including box articles, summaries, and suggested readings for each chapter."--David W. MacDougall, *Plant Science Bulletin*

#### About the Author

Richard B. Primack is a Professor in the Biology Department at Boston University, USA. Dr. Primack was President of the Association for Tropical Biology and Conservation and is currently Editor-in-Chief of the journal *Biological Conservation*. His research interests include the biological impacts of climate change; the loss of species in protected areas; tropical forest ecology and conservation; and conservation education.
