Caterpillars in the Field and Garden: A Field Guide to the Butterfly Caterpillars of North America (Butterflies Through Binoculars) By Thomas J. Allen, James P. Brock, Jeffrey Glassberg

Jeffrey Glassberg's acclaimed *Butterflies through Binoculars* guides have revolutionized the way we view butterflies. Now there's a field guide in the same practical format, and with the same emphasis on conservation, to identify caterpillars.

Caterpillars are as varied, fascinating, and often as colorful as the adult butterflies they become. This is the most comprehensive guide to these creatures available. It contains all the information necessary to find and identify the caterpillars of North America--from Two-tailed Swallowtails, some of the largest butterfly caterpillars at just over two inches when fully grown, to tiny Western Pygmy-Blues. Caterpillar seekers will learn how to distinguish between butterfly caterpillars and moth caterpillars, where and how to find caterpillars, and the visual differences between young and older caterpillars. Each species section describes how to identify the caterpillar, complete with brilliant photos--many published here for the first time. To make for easy field use, each caterpillar's key physical features, abundance, habitat, and major hostplants are listed on the same page as its photo. The book also contains a special section on butterfly gardening, offering valuable information on how to set up a butterfly garden and raise healthy butterfly caterpillars, and provides a thorough list of the plants butterflies most like to feast on.

From the concerned gardener who wishes not to kill caterpillars that may one day become beautiful butterflies to the serious butterflyer wishing to take the hobby to the next level, this remarkable guide will provide all of the information necessary for an enriching caterpillar experience.

So when you make sure to read this book you can get a lot of benefit. The book was authored by the very famous author. Mcdougal makes some research prior to write this book. This book very easy to read you can obtain the point easily after reading this book.

Marjorie Ishee:

As a college student exactly feel bored in order to reading. If their teacher expected them to go to the library or even make summary for some e-book, they are complained. Just minor students that has reading's heart or real their pastime. They just do what the educator want, like asked to go to the library. They go to right now there but nothing reading really. Any students feel that studying is not important, boring and can't see

colorful photographs on there. Yeah, it is for being complicated. Book is very important in your case. As we know that on this era, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. Therefore , this Caterpillars in the Field and Garden: A Field Guide to the Butterfly Caterpillars of North America (Butterflies Through Binoculars) can make you truly feel more interested to read.
