

Embedded Hardware: Know It All (Newnes Know It All)

By Jack Ganssle, Bob Perrin, Kamal Hyder, Ken Arnold, David J. Katz, Lewin Edwards, Fred Eady, Tammy Noergard

Embedded Hardware: Know It All (Newnes Know It All) By Jack Ganssle, Bob Perrin, Kamal Hyder, Ken Arnold, David J. Katz, Lewin Edwards, Fred Eady, Tammy Noergard

The Newnes Know It All Series takes the best of what our authors have written to create hard-working desk references that will be an engineer's first port of call for key information, design techniques and rules of thumb. Guaranteed not to gather dust on a shelf!

Circuit design using microcontrollers is both a science and an art. This book covers it all. It details all of the essential theory and facts to help an engineer design a robust embedded system. Processors, memory, and the hot topic of interconnects (I/O) are completely covered. Our authors bring a wealth of experience and ideas; this is a must-own book for any embedded designer.

*A 360 degree view from best-selling authors including Jack Ganssle, Tammy Noergard, and Fred Eady

*Key facts, techniques, and applications fully detailed

*The ultimate hard-working desk reference: all the essential information, techniques, and tricks of the trade in one volume

Editorial Review

Review

"The authors know their subject and present it well. Examples include C and BASIC code that will run on a PIC12F675 microcontroller."

"If you want information about the overall aspects of embedded-system design, this book deserves a look."

"David Katz and Rick Gentile of Analog Devices do an admirable job covering memory architectures and storage technologies and devices."

"The authors know their subject and present it well."

ECN

About the Author

Jack Ganssle has 30 years' experience developing embedded systems. He has authored two books, *The Art of Programming Embedded Systems* and *The Art of Designing Embedded Systems*, and writes a regular column in *Embedded Systems Programming* magazine. **Michael Barr** is the editor-in-chief of *Embedded Systems Programming* magazine and the principal of Neutrino Consultants Network. He wrote *Programming Embedded Systems in C and C++*.

Tammy Noergaard is Chief Specialist in Embedded Systems at Terma, Denmark. Tammy has a wealth of professional experience including Technical Lead/Manager (Denmark) at Vestas Wind Systems A/S, independent consultancy in systems engineering and as a Field Engineering Specialist for two Silicon Valley-based corporations. She has also worked as a software engineer with Sony Electronics and Hyundai.

As an engineering consultant, Fred Eady has implemented communications networks for the space program and designed hardware and firmware for the medical, retail and public utility industries. He currently writes a monthly embedded design column for a popular electronics enthusiast magazine. Fred also composes monthly articles for a popular robotics magazine. Fred has been dabbling in electronics for over 30 years. His embedded design expertise spans the spectrum and includes Intel's 8748 and 8051 microcontrollers, the entire Microchip PIC microcontroller family and the Atmel AVR microcontrollers. Fred recently retired from his consulting work and is focused on writing magazine columns and embedded design books.

Lewin Edwards is an embedded engineer with over 15 years experience designing embedded systems hardware, firmware, and control software.

Rick Gentile joined ADI in 2000 as a Senior DSP Applications Engineer, and he currently leads the Processor Applications Group, which is responsible for Blackfin, SHARC and TigerSHARC processors. Prior to joining ADI, Rick was a Member of the Technical Staff at MIT Lincoln Laboratory, where he designed several signal processors used in a wide range of radar sensors. He has authored dozens of articles and presented at multiple technical conferences. He received a B.S. in 1987 from the University of Massachusetts at Amherst and an M.S. in 1994 from Northeastern University, both in Electrical and Computer Engineering.

Ken Arnold is the founder and former president of Paragon Engineering Services, Houston, Texas. He has more than 40 years of experience in the operations and project management. He is actively involved in production facility design. He has served on numerous SPE, API, and government advisory committees as an expert on oil handling, produced-water treating, and safety aspects producing operations.

Users Review

From reader reviews:

Margaret Burton:

In other case, little folks like to read book Embedded Hardware: Know It All (Newnes Know It All). You can choose the best book if you like reading a book. Providing we know about how is important any book Embedded Hardware: Know It All (Newnes Know It All). You can add expertise and of course you can around the world by just a book. Absolutely right, mainly because from book you can understand everything! From your country right up until foreign or abroad you will end up known. About simple issue until wonderful thing you can know that. In this era, we can easily open a book or perhaps searching by internet system. It is called e-book. You can utilize it when you feel bored stiff to go to the library. Let's read.

Catherine Rubio:

Do you have something that you prefer such as book? The reserve lovers usually prefer to select book like comic, limited story and the biggest you are novel. Now, why not hoping Embedded Hardware: Know It All (Newnes Know It All) that give your pleasure preference will be satisfied through reading this book. Reading habit all over the world can be said as the method for people to know world far better then how they react when it comes to the world. It can't be explained constantly that reading habit only for the geeky man or woman but for all of you who wants to end up being success person. So , for all of you who want to start reading as your good habit, you can pick Embedded Hardware: Know It All (Newnes Know It All) become your current starter.

Dwight Bailey:

Your reading sixth sense will not betray anyone, why because this Embedded Hardware: Know It All (Newnes Know It All) reserve written by well-known writer who really knows well how to make book that could be understand by anyone who have read the book. Written inside good manner for you, still dripping wet every ideas and publishing skill only for eliminate your hunger then you still skepticism Embedded Hardware: Know It All (Newnes Know It All) as good book not merely by the cover but also with the content. This is one e-book that can break don't evaluate book by its include, so do you still needing one more sixth sense to pick this!? Oh come on your looking at sixth sense already alerted you so why you have to listening to a different sixth sense.

Mary Ransom:

Are you kind of stressful person, only have 10 as well as 15 minute in your morning to upgrading your mind skill or thinking skill also analytical thinking? Then you are experiencing problem with the book as

compared to can satisfy your short period of time to read it because all of this time you only find e-book that need more time to be examine. Embedded Hardware: Know It All (Newnes Know It All) can be your answer as it can be read by anyone who have those short time problems.
