

Networks: A Very Short Introduction (Very Short Introductions)

By Guido Caldarelli, Michele Catanzaro

Networks: A Very Short Introduction (Very Short Introductions) By Guido Caldarelli, Michele Catanzaro

Networks are involved in many aspects of everyday life, from food webs in ecology and the spread of pandemics to social networking and public transportation. In fact, some of the most important and familiar natural systems and social phenomena are based on a networked structure. It is impossible to understand the spread of an epidemic, a computer virus, large-scale blackouts, or massive extinctions without taking into account the network structure that underlies all these phenomena. In this *Very Short Introduction*, Guido Caldarelli and Michele Catanzaro discuss the nature and variety of networks, using everyday examples from society, technology, nature, and history to illuminate the science of network theory. The authors describe the ubiquitous role of networks, reveal how networks self-organize, explain why the rich get richer, and discuss how networks can spontaneously collapse. They conclude by highlighting how the findings of complex network theory have very wide and important applications in genetics, ecology, communications, economics, and sociology.

Editorial Review

About the Author

Guido Caldarelli is Associate Professor in the Institute of Complex Networks of the National Research Council in Rome, Italy. He is an expert of scale-free networks and self-similar phenomena, especially of the applications of network theory to information technology and biology.

Michele Catanzaro is a freelance science writer based in Barcelona, Spain.

Users Review

From reader reviews:

Lavelle Hildreth:

Networks: A Very Short Introduction (Very Short Introductions) can be one of your beginning books that are good idea. We all recommend that straight away because this e-book has good vocabulary that can increase your knowledge in terminology, easy to understand, bit entertaining but nonetheless delivering the information. The author giving his/her effort to set every word into pleasure arrangement in writing Networks: A Very Short Introduction (Very Short Introductions) yet doesn't forget the main level, giving the reader the hottest and based confirm resource info that maybe you can be considered one of it. This great information can easily drawn you into brand-new stage of crucial thinking.

Richard Reardon:

With this era which is the greater man or woman or who has ability in doing something more are more treasured than other. Do you want to become considered one of it? It is just simple strategy to have that. What you need to do is just spending your time not very much but quite enough to get a look at some books. One of several books in the top listing in your reading list is definitely Networks: A Very Short Introduction (Very Short Introductions). This book which can be qualified as The Hungry Hills can get you closer in becoming precious person. By looking right up and review this reserve you can get many advantages.

William McClanahan:

Do you like reading a e-book? Confuse to looking for your preferred book? Or your book has been rare? Why so many concern for the book? But virtually any people feel that they enjoy with regard to reading. Some people likes examining, not only science book but in addition novel and Networks: A Very Short Introduction (Very Short Introductions) or others sources were given expertise for you. After you know how the truly great a book, you feel would like to read more and more. Science publication was created for teacher or maybe students especially. Those guides are helping them to increase their knowledge. In different case, beside science publication, any other book likes Networks: A Very Short Introduction (Very Short Introductions) to make your spare time more colorful. Many types of book like here.

Eun Russell:

What is your hobby? Have you heard this question when you got scholars? We believe that that problem was given by teacher to the students. Many kinds of hobby, All people has different hobby. And you also know that little person such as reading or as reading become their hobby. You have to know that reading is very important in addition to book as to be the point. Book is important thing to add you knowledge, except your teacher or lecturer. You see good news or update about something by book. A substantial number of sorts of books that can you go onto be your object. One of them is Networks: A Very Short Introduction (Very Short Introductions).
