The Ethics of Information By Luciano Floridi

Luciano Floridi develops an original ethical framework for dealing with the new challenges posed by Information and Communication Technologies (ICTs). ICTs have profoundly changed many aspects of life, including the nature of entertainment, work, communication, education, health care, industrial production and business, social relations, and conflicts. They have had a radical and widespread impact on our moral lives and on contemporary ethical debates. Privacy, ownership, freedom of speech, responsibility, technological determinism, the digital divide, and pornography online are only some of the pressing issues that characterise the ethical discourse in the information society. They are the subject of Information Ethics (IE), the new philosophical area of research that investigates the ethical impact of ICTs on human life and society.

Since the seventies, IE has been a standard topic in many curricula. In recent years, there has been a flourishing of new university courses, international conferences, workshops, professional organizations, specialized periodicals and research centres. However, investigations have so far been largely influenced by professional and technical approaches, addressing mainly legal, social, cultural and technological problems. This book is the first philosophical monograph entirely and exclusively dedicated to it.

Floridi lays down, for the first time, the conceptual foundations for IE. He does so systematically, by pursuing three goals:

- a) a metatheoretical goal: it describes what IE is, its problems, approaches and methods;
- b) an introductory goal: it helps the reader to gain a better grasp of the complex and multifarious nature of the various concepts and phenomena related to computer ethics;
- c) an analytic goal: it answers several key theoretical questions of great philosophical interest, arising from the investigation of the ethical implications of ICTs.

Although entirely independent of *The Philosophy of Information* (OUP, 2011), Floridi's previous book, *The Ethics of Information* complements it as new work on the foundations of the philosophy of information.

Editorial Review

Review

"Floridi's book challenges standard ethics. In standard ethics, life has priority in moral evaluation. However, in Floridi's *Information Ethics*, information systems are equal in moral value to living systems. Floridi develops his Ethics as part of a new ontological theory of the *Infosphere*." -- *Dialogue: Canadian Philosophical Review*

"In this groundbreaking work, Luciano Floridi builds the foundations of Information Ethics (IE) by arguing that an informational interpretation of reality is required due to our increased reliance on information and communication technologies (ICTs) for our well-being and success." -- *The Review of Metaphysics*

About the Author

Luciano Floridi, *University of Oxford*

Luciano Floridi is Professor of Philosophy and Ethics of Information at the University of Oxford, where he is also the Director of Research and Senior Research Fellow of the Oxford Internet Institute, Governing Body Fellow of St Cross College, Distinguished Research Fellow of the Uehiro Centre for Practical Ethics, Faculty of Philosophy, and Research Associate and Fellow in Information Policy of the Department of Computer Science. He is also Adjunct Professor ("Distinguished Scholar in Residence") of the Department of Economics, American University, Washington D. C. Among his recognitions, he is recipient of the APA's Barwise Prize, AISB Fellowship, the IACAP's Covey Award, and the INSEIT's Weizenbaum Award. His other books include *The Philosophy of Information* (OUP, 2011), *Information: A Very Short Introduction* (OUP, 2010), and *The Fourth Revolution* (OUP, 2014).

Users Review

From reader reviews:

Nancy Adams:

Now a day those who Living in the era where everything reachable by match the internet and the resources within it can be true or not involve people to be aware of each information they get. How people have to be smart in acquiring any information nowadays? Of course the answer is reading a book. Studying a book can help folks out of this uncertainty Information specially this *The Ethics of Information* book since this book offers you rich info and knowledge. Of course the information in this book hundred percent guarantees there is no doubt in it as you know.

Mark Ames:

Your reading 6th sense will not betray you, why because this The Ethics of Information reserve written by well-known writer who knows well how to make book that may be understand by anyone who all read the book. Written within good manner for you, leaking every ideas and producing skill only for eliminate your hunger then you still skepticism The Ethics of Information as good book not simply by the cover but also from the content. This is one reserve that can break don't assess book by its deal with, so do you still needing a different sixth sense to pick this specific!? Oh come on your examining sixth sense already alerted you so why you have to listening to another sixth sense.

Michael Farrell:

As a college student exactly feel bored in order to reading. If their teacher requested them to go to the library or even make summary for some reserve, they are complained. Just minor students that has reading's internal or real their pastime. They just do what the trainer want, like asked to the library. They go to generally there but nothing reading very seriously. Any students feel that looking at is not important, boring as well as can't see colorful pictures on there. Yeah, it is being complicated. Book is very important for yourself. As we know that on this era, many ways to get whatever you want. Likewise word says, ways to reach Chinese's country. Therefore , this The Ethics of Information can make you really feel more interested to read.

Kathleen Sinclair:

What is your hobby? Have you heard that will question when you got learners? We believe that that issue was given by teacher for their students. Many kinds of hobby, Every person has different hobby. And you know that little person similar to reading or as reading through become their hobby. You must know that reading is very important in addition to book as to be the matter. Book is important thing to include you knowledge, except your own teacher or lecturer. You see good news or update in relation to something by book. Amount types of books that can you choose to use be your object. One of them are these claims The Ethics of Information.
