Titan (NASA Trilogy) By Stephen Baxter

Humankind's greatest--and last--adventure!

Possible signs of organic life have been found on Titan, Saturn's largest moon. A group of visionaries led by NASA's Paula Benacerraf plan a daring one-way mission that will cost them everything. Taking nearly a decade, the billion-mile voyage includes a "slingshot" transit of Venus, a catastrophic solar storm, and a constant struggle to keep the ship and crew functioning. But it is on the icy surface of Titan itself that the true adventure begins. In the orange methane slush the astronauts will discover the secret of life's origins and reach for a human destiny beyond their wildest dreams.

Editorial Review

Review

'Buy TITAN, read it - then go out and buy everything else that Baxter has ever written' New Scientist 'This is a tale of equivalent scope to 2001, while the visions of Titan life have that sense of Clarke-style cosmic sorrow' SFX 'A plausible tale of America's last gasp at interplanetary exploration... Stephen Baxter proves what a cosmic thinker he is' Washington Post Book World

About the Author

Stephen Baxter applied to become an astronaut in 1991. He didn't make it, but achieved the next best thing by becoming a science fiction writer, and his novels and short stories have been published and have won awards around the world. His science background is in maths and engineering. He is married and lives in Northumberland.

Users Review

From reader reviews:

Joe Bell:

Do you have favorite book? In case you have, what is your favorite's book? Publication is very important thing for us to learn everything in the world. Each publication has different aim or perhaps goal; it means that publication has different type. Some people really feel enjoy to spend their a chance to read a book.
