Teaching and Learning Proof Across the Grades: A K-16 Perspective (Studies in Mathematical Thinking and Learning Series) From Routledge

A Co-Publication of Routledge for the National Council of Teachers of Mathematics (NCTM)

In recent years there has been increased interest in the nature and role of proof in mathematics education; with many mathematics educators advocating that proof should be a central part of the mathematics education of students at all grade levels. This important new collection provides that much-needed forum for mathematics educators to articulate a connected K-16 "story" of proof. Such a story includes understanding how the forms of proof, including the nature of argumentation and justification as well as what counts as proof, evolve chronologically and cognitively and how curricula and instruction can support the development of students' understanding of proof. Collectively these essays inform educators and researchers at different grade levels about the teaching and learning of proof at each level and, thus, help advance the design of further empirical and theoretical work in this area. By building and extending on existing research and by allowing a variety of voices from the field to be heard, *Teaching and Learning Proof Across the Grades* not only highlights the main ideas that have recently emerged on proof research, but also defines an agenda for future study.

Editorial Review

About the Author

Despina A. Stylianou is an Associate Professor of Mathematics Education at the City College of the City University of New York.

Maria L. Blanton is a Senior Executive Research Associate at the James J. Kaput Center for Research and Innovation in Mathematics Education and an Associate Professor of Mathematics Education at the University of Massachusetts, Dartmouth.

Eric J. Knuth is an Associate Professor of Mathematics Education at the University of Wisconsin-Madison.

Users Review

From reader reviews:

Marian Perkins:

Do you have favorite book? If you have, what is your favorite's book? Book is very important thing for us to find out everything in the world. Each publication has different aim or perhaps goal; it means that e-book has different type. Some people truly feel enjoy to spend their time and energy to read a book. They can be reading whatever they take because their hobby will be reading a book. How about the person who don't like looking at a book? Sometime, individual feel need book once they found difficult problem as well as exercise. Well, probably you will require this Teaching and Learning Proof Across the Grades: A K-16 Perspective (Studies in Mathematical Thinking and Learning Series).

Leo Rizer:

Hey guys, do you wants to finds a new book to see? May be the book with the headline Teaching and Learning Proof Across the Grades: A K-16 Perspective (Studies in Mathematical Thinking and Learning Series) suitable to you? Typically the book was written by famous writer in this era. The book untitled Teaching and Learning Proof Across the Grades: A K-16 Perspective (Studies in Mathematical Thinking and Learning Series)is one of several books that everyone read now. This kind of book was inspired many men and women in the world. When you read this e-book you will enter the new way of measuring that you ever know ahead of. The author explained their thought in the simple way, thus all of people can easily to understand the core of this reserve. This book will give you a lots of information about this world now. So that you can see the represented of the world with this book.

Dewayne Campbell:

Do you have something that you enjoy such as book? The publication lovers usually prefer to select book like comic, short story and the biggest one is novel. Now, why not seeking Teaching and Learning Proof Across the Grades: A K-16 Perspective (Studies in Mathematical Thinking and Learning Series) that give your entertainment preference will be satisfied by reading this book. Reading addiction all over the world can be said as the method for people to know world better then how they react toward the world. It can't be explained constantly that reading addiction only for the geeky man but for all of you who wants to end up being success person. So , for every you who want to start reading through as your good habit, it is possible to pick Teaching and Learning Proof Across the Grades: A K-16 Perspective (Studies in Mathematical Thinking and Learning Series) become your starter.

Alberta Townsend:

The book untitled Teaching and Learning Proof Across the Grades: A K-16 Perspective (Studies in Mathematical Thinking and Learning Series) contain a lot of information on the idea. The writer explains the girl idea with easy way. The language is very easy to understand all the people, so do not necessarily worry, you can easy to read the idea. The book was published by famous author. The author provides you in the new age of literary works. You can actually read this book because you can read more your smart phone, or gadget, so you can read the book in anywhere and anytime. In a situation you wish to purchase the e-book, you can wide open their official web-site in addition to order it. Have a nice study.
